Friendly issue URLs

Issues

Update status should indicate security coverage

Problem/Motivation

To support the recent changes to the project application process, namely decoupling the ability to create full projects/releases from security coverage – we need to provide indicators on the update status page of which installed modules receive security coverage.

@hestenet, @drumm, and @mlhess hope to help drive this forward. @Dries has given his blessing to prioritize this patch.

We (the DA) want to get this committed as soon as possible, and so we're allocating our sprint time towards getting this ready, writing tests, and responding to any reviews.

What is the problem to solve?

Explanations for issue tags

1d ThemeEngineExtensionList classes refactor theme

API clean-up

Refactors an existing [API](#) or subsystem for consistency, performance, modularization, flexibility, third-party integration, etc. May imply an API change. Frequently used during the [Code Slush](#) phase of the release cycle.

Needs profiling

May affect performance, and thus requires in-depth technical reviews and [profiling](#).

[Drupal.org webmasters](#) ★ 2

This is a project with issue tracker you can use to, among other things, report user account problems, report spammers, or request a conf

[Drupal.org cross-site customizations](#) ★ 2

Customizations for all Drupal.org sites. Including the footer, some navigation, and search indexing.

[RESTful Web Services](#) ★ 5

Exposes Drupal resources (e.g. entities) as RESTful web services.

[Project issue tracking](#) ★ 4

This module provides issue tracking for projects created with the Project module.

[Drupal.org security advisory coverage applications](#) ★ 8

Project creation

Everyone can make full projects

No waiting for community review

Can create release right away

Security advisory coverage still requires review

Core branch labels

Environment

PHP 5.5 & MySQL 5.5

Core

- Development, currently *drupal 8.6.x-dev***
The latest development branch
- Pre-release / supported, currently *drupal 8.5.x-dev***
When a new minor release is upcoming, the branch pre-releases are tagged on / falls back to supported otherwise
- Stable, currently *drupal 8.4.4***
The most recent stable release
- Supported, currently *drupal 8.4.x-dev***
The most recent stable release branch with bug fixes
- drupal 8.6.x-dev
- drupal 8.5.x-dev
- drupal 8.4.x-dev

DrupalCI JavaScript testing

phantomjs support

Replacing with webDriver & headless Chrome

drupal.org/project/drupal/issues/2775653

DrupalCI: under the hood improvements

AWS per-second billing

More simple instance termination

More concurrent test runners

Less time in queue, faster results

Site reliability

Working with Tag1

Improving monitoring & alerting

Server upgrades

PerimeterX

Drupal.org is fronted by Fastly

PerimeterX

Our servers get the uncached traffic

Developer tools

Developer tools goals

Productive development

Collaborative workflow

Contribution credit

Maintainability for the Drupal Association

Home of the project

Technical goals

Merge/pull requests

Code review

Inline editing

GitHub

Familiar to many developers

Lacking collaborative workflow

Would not work as home of the project
